

Dear FCC,

We at WLRN Radio Reading Service are excited at the new possibilities that Digital Radio will offer those unable to use print in the South Florida area. We serve four counties in southern Florida and are excited over the prospect of transmitting a crystal clear signal throughout. Our reception has always been a challenge to the many listeners who are loaned a radio, free of charge, to receive the daily broadcasts of news and information. We are fortunate enough in South Florida not to have geographical impediments such as mountains or hills, but we still find ourselves dealing with high-rises built of steel and concrete which unfortunately negatively affects our listeners' reception. We look forward to being able to transmit a crystal clear signal to our listeners so that they can listen to us "noise" free.

In this ever changing digital age it very important that consumers are given not only many choices but also a simple way of understand all these new gadgets so that they are used productively. It is therefore very important to the print impaired and disabled community to have devices which are accessible. If the manufacturers start designing accessible devices early on it will be much easier to come up with the best solutions to whatever challenges the print impaired community will encounter with the new technologies - it is best to figure out what problems will occur early on rather than fix it once these devices start becoming embedded in the market. It is very common nowadays for manufacturers to create technologies that are far too complicated for use in the real world.

It is also very important to the independence of those unable to use print to have a reading service available in whichever community they may reside in our country. That is why every radio station must have a dedicated space for radio reading services rather than have reading services lobbying with their respective main channel station for their right to be broadcast digitally.
